

i-Q Motivizer English

Quality is when the customer returns not the product.

If you would like to find a way through the dark you should light a candle.

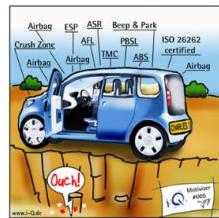

It's better to be partially right when 100% wrong.

A smile costs nothing and will be well received.

I thought I made it fool-proof...but they proved me wrong.

These two Motivizers do not work in English language....

...just like baked beans do not work as German breakfast.

Use the data in the correct manner to reach the correct decision!

Everyday's life mathematics. How engineers see the world:

Ask the FSM* ... in advance ...

*Functional Safety Manager

Do not celebrate too early! The Service-PPAP has arrived!

Just because it is incredibly expensive does NOT make it the best!

Quality can be observed from many different angles.

Watching the grass doesn't make it grow faster.

Quality is no coincidence. It needs intelligence and will to make a thing better.

If done itself to the effect before the rush hour.

Autonomous driving brings with it unforeseen problems.

Self-determination depends not in having much but on needing little.

If autonomous vehicles communicate with each other...

How a typical software project in the automotive industry proceeds...

SOP = Start of Production

Still the biggest problem with web meetings: finding meeting time slots

Duty-conscious work does not necessarily lead to a meaningful result.

The standardization committee has met.
